

Complete Supply Solutions

We offer our customers end-to-end support, from R&D through to volume production, providing you with expert assistance in integrating this technology into world-changing new products.

Value Added Services

Key to our success has been the development of our Value Added Services. We offer a comprehensive range of technical, commercial, value-added, training and support services.

- Sourcing & Obsolescence Solutions
- Optoelectronics Design & Manufacture
- End-to-End IoT Solutions
- 4G/5G Router Configuration Service & Consultancy
- Device Programming
- Firmware Version Control
- Tape & Reel and Mini Reel
- Bake & Seal

Services are carried out in our **secure, bespoke, ESD facility in line with our AS9100 certification**. UK warehousing and multiple logistics services ensure on time delivery through buffer stocks, consignment stocks and VMI programmes.

Quality

A focus on quality has always been important for Solsta. Our aim is to make even the smallest process reliable and robust, and we employ quality management tools to provide a framework for collecting and analysing data to this end.

The quality certifications and accreditations listed below represent recognised industry benchmarks, and provide assurance of our capabilities to maintain robust and reliable processes and procedures.

The vital component

Solsta is a world-leading electronic component distributor and a catalyst for technological innovation.

We help the electronics community solve the problems that can't be solved alone, drawing on unmatched technical knowledge, connections and entrepreneurial spirit. Between us, we have hundreds of years of technical knowledge, yet our focus is firmly on the future - the newest tech, the endless ingenuity of inventors, the world-changing potential of the next big thing.

Innovation with integrity is our passion and our purpose. As such, we operate at the heart of the electronics community, as the trusted partner for our customers and suppliers. We are the vital component.

Solsta is the new name for Solid State Supplies. We rebranded in 2023 - after many years of growth and expansion, our company today offers much more than just "solid state" components, and with our wealth of value-added services, we do much more than just "supply". Our new brand lies at the heart of our business - it represents who we are today, and it's what makes us unique.

Premium Product Portfolio

We distribute a wide range of best-in-class semiconductors and related components and modules from a carefully selected stable of leading edge supplies. Our portfolio contains the components you need to unlock vital innovation in your concepts and designs.
